## SUMMARY

React JS Developer with 3+ years of experience building scalable web applications and enterprise solutions across HRMS, e-commerce, and B2B platforms. Proficient in JavaScript, TypeScript, and modern frontend frameworks with expertise in Redux Toolkit, WebSocket integration, and responsive UI design. Proven track record of delivering complex projects, including recruitment systems, payroll management, and multi-vendor e-commerce platforms with integrated payment gateways. Implemented AI-powered automation and optimisation in B2B and EasyCatering platforms to enhance performance, speed, and user experience.

## TECHNICAL SKILLS

**Languages & Frameworks:** JavaScript, TypeScript, React.js, Next.js, HTML5, CSS3

**UI Libraries:** Tailwind CSS, Bootstrap, Material UI, Ant Design, HeroUI

**State Management:** Redux Toolkit

**Tools & Technologies:** WebSocket, Git, GitHub, Razor Pay Integration

**AI Development Tools:** Cursor AI, Trea AI, Claude AI, Perplexity, ChatGPT, DeepSeek

## PROFESSIONAL EXPERIENCE

### Frontend Developer | TechX Solutions | Ahmedabad (Remote)

May 2025 – Present

- Developed comprehensive e-commerce platform "Easy Catering" featuring merchant onboarding system for restaurant partners, resulting in streamlined vendor management
- Implemented complete user-side functionality including order checkout, cart management, and Razor Pay payment gateway integration, enhancing transaction efficiency
- Built admin dashboard with real-time analytics and vendor management capabilities for monitoring platform operations
- Created B2B marketplace connecting sellers and buyers with product upload functionality, approval workflows, and automated order processing
- Converted NGR Property website from vanilla HTML/CSS to modern React.js architecture with Tailwind CSS, improving performance and maintainability by 40%

### React JS Developer | Superworks, Surat

November 2022 – February 2025 (2 years 4 months)

- Developed and maintained five enterprise-level HR modules: HRMS, Chat, Recruitment, Payroll, and PMS serving 500+ daily users
- Built real-time chat application using WebSocket technology, enabling seamless internal communication for distributed teams
- Implemented recruitment module with applicant tracking system, automated candidate screening, and interview scheduling functionality
- Created comprehensive payroll management system with tax calculation, salary processing, and compliance reporting features
- Designed performance management system (PMS) with goal tracking, evaluation workflows, and analytics dashboard
- Optimized API calls and component rendering, reducing page load times by 25% and improving overall user experience

## KEY PROJECTS

### Easy Catering – E-commerce Catering Marketplace

**Tech Stack:** React.js • TypeScript • Tailwind CSS • Redux • Recharts • HeroUI • Socket.io • Razorpay

- Built a multi-sided marketplace enabling restaurant onboarding, menu management, and customer ordering workflows.
- Implemented cart, checkout, live order tracking, and Razorpay payment integration.
- Developed a robust admin panel for merchant verification, analytics, and platform operations.
- Added real-time communication using Socket.io for order status updates and merchant alerts.

### B2B Marketplace

**Tech Stack:** React.js • TypeScript • Tailwind CSS • Redux • Recharts • HeroUI

- Developed an enterprise-grade B2B marketplace with seller product management, buyer procurement workflows, and automated approvals.
- Built admin controls for product verification, compliance monitoring, and multi-role access.
- Implemented scalable UI modules for catalog management, order lifecycle, and dashboard analytics.

### Superworks HRMS Suite

**Tech Stack:** React.js • SCSS • Redux • Recharts • Context API • Webpack

- Designed and developed a comprehensive HRMS covering recruitment, payroll, performance management, attendance, and employee lifecycle tracking.
- Added real-time chat communication, role-based dashboards, and modular HR workflows.
- Improved overall performance with optimised Webpack bundling and scalable component architecture.

### Bluewings Travel Website

**Tech Stack:** React.js • TypeScript • Tailwind CSS

- Migrated a legacy HTML/CSS travel website to a modern React + TypeScript architecture.
- Integrated REST APIs for travel data, bookings, destinations, and dynamic content management.
- Enhanced usability with responsive design, route-based navigation, and optimised performance.

### PRI0 Fire Detection System

**Tech Stack:** React.js • TypeScript • Tailwind CSS • REST APIs • Figma (UI/UX)

- Developed PRI0 Fire Detection, a smart safety dashboard built with React + TypeScript and Tailwind CSS, integrating real-time fire alerts using external APIs.
- Designed a modern, responsive UI in Figma and implemented it pixel-perfect in code.
- Built modules for live sensor data monitoring, alert visualisation, and quick-action response flow.
- Ensured high performance, clean architecture, and reusable components for scalable system integration.

### Flathose Product Information Portal

**Tech Stack:** React.js • TypeScript • Tailwind CSS • REST APIs • Figma (UI/UX)

- Developed Flathose, an industrial product information platform built with React + TypeScript and Tailwind CSS, featuring a responsive green UI and structured product catalogue.
- Designed modern navigation for About, Vision, Products, and Blogs while ensuring clean UX and component consistency.
- Implemented weekly blog publishing, subscription workflow, and SEO-friendly architecture for content engagement.

### Abrolly – Visa Application & Agent Management System

**Tech Stack:** React.js • TypeScript • Tailwind CSS • Redux • Recharts • HeroUI

- Built a complete visa processing platform for both students and agents, including application submission, document uploads, and status tracking.
- Implemented role-based dashboards for students, agents, and admins with automated workflow stages.
- Added modules for document verification, payment tracking, lead management, and communication logs.
- Designed a clean, intuitive UI to simplify complex visa journeys and improve processing transparency.
